

Project Outdoor ICT - RESULTS

[Recommendations of exploitation of results of previous projects](#)

Description

During the first project meeting in Udine, Italy, several projects were presented as best practice examples, which can bring the partners new ideas for training possibilities. The presented project can furthermore deliver input for the design of "outdoor ICT" and support the exchange between the partners through sharing methods and content. Following that, this document contains descriptions of various projects, which were presented at this meeting.

[Training courses: abstracts](#)

Description

Main information related to the training course taking place organized by the different institutions for their students in the framework of the Outdoor ICT partnership

[State of the Art Analysis](#)

Description

To have a concrete starting idea on the situation regarding ICT and digital tools' availability and request in each partners' communities, the partnership has produced a State Of The Art analysis report which has also investigated the needs of adult users and seniors aged 45+ in the different locations of the partners. This work has mainly been useful for each partner institution to reflect and investigate on what is available at the moment in the field and act within the project aims in accordance with the resources in the territories and the progressive ageing of the population.
